## GENERAL INFORMATION

**YARDAGE™** is a multi-functional adjuvant designed to lower the pH of spray solutions, thus preventing alkaline hydrolysis of pesticides sensitive to high pH.

- Lowers surface tension of tank mix, allowing spray droplets to spread upon contact
  - Increased contact area drives pesticide actives into the plant faster
  - Allows water to penetrate hydrophobic surfaces ensuring delivery of actives
- Ensures consistent spray droplet size
  - Uniform deposition of spray droplets on plant surfaces

### Ideal For:

- Pesticides that are sensitive to high pH
- Water with high alkalinity
- Keeping sprays from drifting onto sensitive plants nearby
- Use around aquatic environments

The unique combination of qualities provides the user with an extra measure of confidence that the application can provide better pest control.

## DIRECTIONS FOR USE

### ALWAYS FOLLOW THE DIRECTIONS ON THE LABEL OF ANY PEST CONTROL PRODUCT.

**YARDAGE™** may be used with any herbicide, insecticide, fungicide or other pest control product that allows or requires the use of a spray additive.

This product may be used in accordance with the label instructions to adjust pH of pesticides that have been approved for aquatic use.

For large or small tanks, fill the tank 1/3 to 1/2 full of water. Add **YARDAGE™** at the suggested use rate. Continue agitation while adding the recommended amount of pest control product, continuing agitation prior to spray application.

The user must have experience with this product or have tested this product in the application and on all plants before use. To test the product, make the exact mixture desired and spray a small test area. Then wait at least 48 hours to see if damage occurs.
